

An all natural wellness kit for poultry health and productivity

Raising backyard chickens can be a rewarding family experience, but it requires daily attention to keep your chickens healthy – and to protect your family.

In fact, chicken mortality can be as high as 50% without simple measures to help fight the common causes of disease.

That's why we created the all natural, safe and easy to use Backyard Chicken™ Health Pack.

Bolster the health of your birds and poultry of all ages in three easy steps

Step One Starting on day one, add six drops of Oxy E-100 to each gallon of fresh drinking water. Wait 15 minutes.

Step Two Starting on day one, add one HealthyFlock® Tab in each gallon of fresh drinking water 15 minutes after the addition of Oxy E-100.

Step Three Starting on day 21, also add six drops of Zyfund® A in each gallon of fresh drinking water for seven days. Repeat the Zyfund A dosing every 21 days.

All natural three step program
to help protect poultry health

A broad preventative approach means less treatment later and increased survivability

Now there's a safe and easy way to help protect birds and poultry of all ages from naturally occurring, disease causing organisms and internal parasites. The Backyard Chicken™ Health Pack is a three step system designed to improve intestinal health, provide safe drinking water, and help protect birds from worm related issues. It's a comprehensive solution to help increase chick survivability, support overall well-being, and increase the bird's ability to handle stress. The Backyard Chicken™ Health Pack consists of three water soluble poultry health aids – HealthyFlock® Tabs, Oxy E-100, and Zyfund® A.

HealthyFlock® Tabs

Contains micro-encapsulated beneficial bacteria, natural enzymes, targeted proteins, odor controlling yucca, and supportive prebiotics.

- Targets harmful pathogens (like Salmonella and E. coli)
- Improves intestinal health
- Contains beneficial bacteria (four total strains)
- All natural formula
- One bottle treats 90 gallons of water

Oxy E-100

Simple and effective treatment to sanitize drinking water and improve water quality.

- Safe and easy to use
- Reduces exposure to pathogens
- One bottle treats 90 gallons of water

Zyfund® A

All natural supplement designed to help break down the natural defenses of intestinal worms and their eggs.

NO EGG DISCARD

- Use one week each month to offset worms
- All natural with no synthetic chemicals
- Used in large organic/natural certified flocks across U.S.
- One bottle treats 90 gallons of water

Effective in any age poultry and waterfowl

The Backyard Chicken Health Pack is safe and effective for use in all ages of chickens, turkeys, ducks, geese, other domestic poultry and waterfowl. One Health Pack treats 90 gallons of water – providing support for 6 chicks for almost five months. Use Backyard Chicken Health products every day to get chicks/poults off to a strong start and help promote healthier, happier, more productive birds throughout their life. Each product is also available for individual purchase.

More information

The Backyard Chicken Health Pack was developed by DBC Ag Products and contains innovative products that are being used successfully every day in large organic and natural certified laying flocks.
